**ROSSI ARCHITECTURE
CATALOGUE**

The background of the image is a detailed architectural floor plan of a building, showing various rooms, corridors, and structural elements. A silver pen is positioned diagonally across the lower right portion of the drawing. In the upper left corner, there is a stylized, semi-transparent logo consisting of three overlapping oval shapes. The entire image is framed by a thin magenta border.

ABOUT US

For nearly 30 years, WE, as part of the EuroSmart Group, have been steadily increasing our market share in the wood industry. This growth is attributed to our accumulated experience, emphasis on quality, and a robust design team.

WE offer customer-oriented and personalized services through our unique designs. OUR company is actively engaged in the design and implementation of interior furniture groups, including but not limited to kitchens, bathrooms, living rooms, youth and children's rooms, restaurants, cafes, school furniture, offices, hospitals, shopping mall and store showrooms, as well as trade fair stand designs and projects.

OUR company is actively engaged in the design and implementation of interior furniture groups, including but not limited to kitchens, bathrooms, living rooms, youth and children's rooms, restaurants, cafes, school furniture, offices, hospitals, shopping mall and store showrooms, as well as trade fair stand designs and projects.

WE provide high-quality products to various regions outside of Turkey and tailor our offerings to meet diverse customer demands. WE are focused on expanding our international activities and increasing the presence of the ROSSI brand in more countries.

At present, we export to approximately 30 countries and undertake projects in custom design manufacturing and project implementation. We have a team consisting of architects, interior designers, and marketing managers, and we have representatives in a total of 13 countries. The contact information for these representatives can be found on our website.

- *Comprehensive Infrastructure Design and Implementation (Mechanical, Electrical, Plumbing)
- *Design and Execution of Sofa Sets, Custom-designed Sofas and Chairs, and Soft Seating Groups
- *Architectural Concept Design, Supervision of Post-Permit Construction Process

The background is a detailed architectural floor plan of a building, featuring various rooms, corridors, and structural elements. A prominent red rectangular border frames the central portion of the image. Overlaid on the left side are several white, stylized cloud graphics of varying sizes. The text "PROJECT EXECUTION PROCESS" is centered in the middle of the image, rendered in a large, bold, black sans-serif font with a subtle drop shadow effect.

PROJECT EXECUTION PROCESS

1.Measurement and Project

The design process of an interior architectural design project needs to be planned from the beginning of the construction. The most crucial factor in the formation of a building is its intended use. In this regard, the design of a building starts from the inside. The purpose of creating an interior design project is to visualize the end result and plan the work to be done during this process. Our task in this process is to guide you correctly and bring you one step closer to your envisioned interior space by presenting the final look of the designed space with visuals. To ensure the process progresses correctly, measurements are taken, and a preliminary project is drawn in two dimensions based on the customer's requirements and instructions. Revisions are made based on the preliminary project, and we move on to the pricing stage.

2.Pricing and Contract

In the formation of your project, the materials for the body and cover, accessories, shelving systems, handles, and all products to be used in the designed space are detailed within the contract. Upon approval of the created price list, the next step is to proceed to the three-dimensional visualization stage for the project.

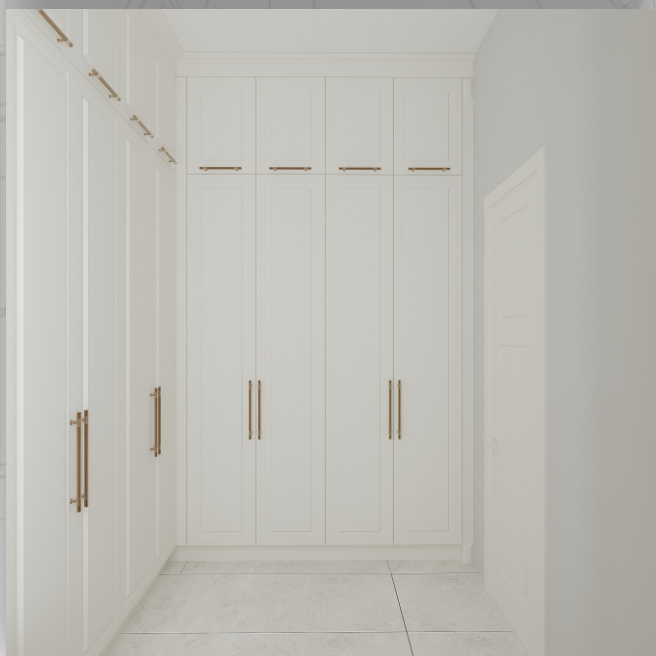

3.3D Rendering

3D visualization is the favorite stage for all of our customers. Our clients get a visual representation of the completed interior space. It's not always easy to imagine. However, this is not the final stage because detailed solutions for furniture and applications are required to bring the designed ideas to life and for craftsmen to carry out a high-quality implementation.

Render works are carried out to help our customers better understand how their furniture will look visually at the end of the project based on the project details.

Example:

4.Revisions and Project Planning

The project planning stage is crucial in terms of bringing the design set in the three-dimensional visualization stage to life. All the details in the planning stage are presented to our customers. Once the final project is established, it proceeds to the approval stage.

5.Approval

If the final project created is accepted by our customers, approval is obtained, and we proceed to the manufacturing stage.

6.Manufacturing and Assembly

Furniture produced on the production line is assembled by our professional teams. The delivery takes place after the assembly of the finished products, with the approval of our customers.

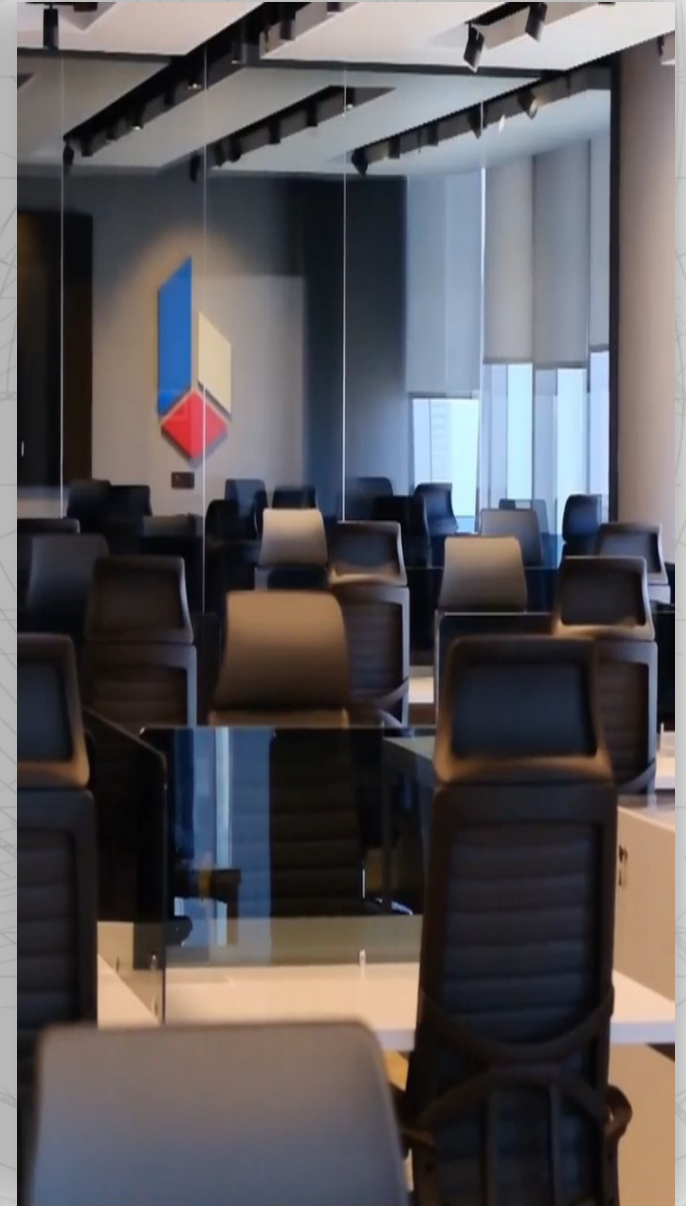

PROJECTS

A top-down view of an architectural workspace. In the center, a pair of hands is pointing at a set of blueprints. The blueprints include a 'BASEMENT ELECT. PLAN' and various other architectural drawings with dimensions and labels like 'Driveway', 'Porte cochère', 'Spa', 'Deck', 'Patio', and 'Bed 3'. Surrounding the blueprints are various tools: a yellow hard hat on the right, a magnifying glass, a calculator, several pencils, and a compass. A red rectangular border frames the central area of the image.
